RE: **PRESS RELEASE—For Immediate Release**

## **CANNON goes lives with new their business operating system**

CANNON Instrument Company is pleased to announce that we have successfully migrated to a new ERP business operating system by Epicor – a world leader in business software solutions.

This new system offers cutting-edge manufacturing and customer/technical service capabilities which will enhance our ability to meet customers' commercial and service expectations in the array of markets we serve by improving processing efficiencies. These efficiencies will enable us to offer shorter delivery times for all our equipment and maintenance parts.

This sizable investment is our commitment to improving our ability to service our many customers and corporate clients who have trusted in our products for their daily business operations.

Our implementation will include future web-enabled functionality for our global dealers and partners.
