

mini AV[®]-X

Single-Bath Kinematic Viscometer

For Kinematic Viscosity of Transparent and Opaque Liquids
ASTM D445/D446, ISO 3104/3105, IP 71

miniAV[®]-X is a fully automated, single-bath, benchtop viscometer with a 10-position sample handler for unattended D445 processing. The Ubbelohde-style tube covers a 100-fold viscosity range at values between 0.5 mm²/s [cSt] and 6,000 mm²/s [cSt] from 15 °C to 100 °C [with available TE cooler].

Common Applications

- Formulated oil analysis
- Hydraulic oil analysis
- Additive analysis
- Marine fuel testing
- Base stock analysis
- Light fuel testing
- Crude oil testing
- Glycols

Product Features & Benefits

D445 precision in a compact, robust design

- Temperature range: ambient to 100 °C [15 °C to 100 °C with available TE cooler]
- Viscosity range: 0.5 mm²/s [cSt] to 6,000 mm²/s [cSt]* in 100-fold increments [easily covering the range of 5 separate manual glass viscometers]
- Fits in roughly the same benchtop area as an analytical balance
- Optional, environmentally friendly Peltier cooling requires no external refrigeration
- A well tested CANNON viscometer platform offers reliability and dependable support

Fully automated benchtop testing

- A fully accessible 10-position sample handler ensures reliable, unattended processing of up to 12 determinations per hour
- Automation provides an alternative to labor-intensive manual testing and reduces operator to operator variability
- VISCPRO[®] PC software enables one PC to manage and control up to four instruments
- User-configurable reports may be viewed, printed, saved and exported

Reduced consumable costs

- ASTM D446/ISO 3105 Ubbelohde-style tube reduces solvent usage and disposal costs by 50%
- Automated vial washing and drying enables reuse and reduces vial consumption

Simplified maintenance & test versatility

- Modular bath for easy maintenance access
- Operators physically replace tubes in minutes, eliminating the need for related service calls
- Single-point temperature calibration avoids tube recalibration costs and maximizes flexibility
- Instrument includes standard dual-solvent input

*Some upper viscosity measurements may be limited by test temperature and sample type. Fast run [10-fold range] tubes are also available.

†Installation outside the domestic U.S. may incur additional charges.

Professional installation[†], VISCPRO[®] data storage and management software, viscometer tube, standards, and a high precision digital thermometer are included
